- **Simplicity:** Eliminate service issues and finger pointing between your PBX vendor, carrier, ISP, and Network Integrator.
- **Economics:** Reduce your monthly communications expenses with free in-network calling and unlimited usage* while eliminating the capital required to purchase new equipment.
- **Productivity:** Integrate communications and your PC Desktop while delivering advanced services to users on the road and at home.
- **Control:** Enjoy unmatched control and point-and-click configuration over all services through our award-winning OSSmosis Portal.
- **Performance:** Our team of network and security professionals monitors and manages your services 24x7.
- **Portable:** Experience the mobility of forwarding your office phone to a cellular phone and access voicemail via email message.
- **Stability:** Enjoy built-in disaster recovery/ business continuity features – the off-premise nature of a hosted IP phone system means that your business keeps running regardless of what happens at your physical location. With multiple failover options, including the option to fail over to public IP, your business stays up and running under all circumstances.
- **Scalability:** Add users and services when needed and leverage the support of experienced PBX professionals.

* Some restrictions may apply

BENEFITS OF HOSTED VOIP

- **Free Long Distance:** Enjoy the cost savings of unlimited local and long distance service.
- **Reliable Support:** Work comfortably knowing your phone service is monitored and managed by a team of network and security professionals 24x7.
- **Hosted in the Cloud:** Enjoy built-in disaster recovery/business continuity features. The off-premise nature of a hosted service, means that your business keeps running regardless of what happens at your physical location. With multiple failover options, including the option to fail over to options, including the option to fail over to public IP, your business stays up and running under most circumstances.
- **Free Three-way calls:** Collaborate with other co-workers on projects without worry about 3-way calling charges.
- **Voice to Email:** Transfer your voicemail messages directly to your email and listen to them anywhere on your laptop or mobile device.
- **Auto-forward calls:** Don't be afraid of missing that one important phone call. Receive calls on your mobile phone, while away from the desk. Calls can also be redirected to anywhere you wish, if you are busy or otherwise unavailable.
- **Separate buildings connected as one:** Have difference branch offices outside your main office? Call someone in a difference location, as if they were in the same building with our hosted VoIP services.
- **Save up to 40%:** Everyone likes saving money, and with hosted VoIP you can realize great savings on your monthly phone service.
